

# Ashish Mali

As an experienced data analyst with a Bachelor's Degree in Mechanical Engineering, I possess a wealth of experience in data handling and a passion for data-driven decision-making. Proficient in Python, SQL, BI tools and Machine Learning, I have a proven track record of delivering successful projects that leverage data insights for impactful outcomes. Seeking opportunities to excel in data analysis roles at esteemed organizations.

## WORK EXPERIENCE

### Senior Executive (Analytics & Engineering) MDIndia Health Insurance TPA Pvt. Ltd.

04/2025 - Present Pune, India  
Skills: Python, SQL, Power BI, AI/ML, Agile, Automation, Modeling, ETL, DAX

#### Achievements/Tasks

- Designed and deployed **enterprise BI solutions in Power BI**, including intuitive dashboards, performance-optimized SQL queries, and secure role-based access controls.
- Worked with **data warehousing systems** to integrate, transform, and model large datasets, enabling scalable and accurate business reporting.
- Conducted **exploratory data analysis, statistical modeling, and predictive analytics**, building and deploying machine learning models for forecasting and decision support.
- Led cross-functional analytics initiatives, **automating data pipelines and translating business needs into data-driven strategies** that delivered measurable impact.
- Authored **clear technical documentation and knowledge assets** to support BI and analytics adoption.

### Power BI Developer GamakaAI Tech Pvt. Ltd.

08/2022 - 03/2025 Pune, India  
Skills: Advance Excel, Python, Power BI, SQL, AI/ML, Azure

#### Achievements/Tasks

- Streamlined data extraction and transformation from **SQL Server, APIs, and flat files** using **Power Query, Dataflows, and Alteryx**, improving **data processing efficiency by 32%**.
- Ensured data quality and accuracy through rigorous testing and validation processes. **reducing the data quality issue by 70%**.
- Built a complex data model involving **star & snowflake schema, optimizing the query efficiency by 20%**.
- Experience in setup of **dataflow, data alert, RLS, schedule & incremental refresh** for multiple report.
- Incorporate the multiple tool such as **Python, SQL, JSON app template & DAX** for multiple ad-hoc operations.
- Employed **Top-Down & Parametric Estimation** for early state project planning & Define the **SLDC process**.

### Business Analyst (Quality Assurance) KiaBiz Solution

01/2022 - 07/2023 Pune, India  
Skills: Excel, SQL, Python, Data Cleaning, Team Work, Communication skill.

- Implemented efficient **batch processing, increasing data processing efficiency by 20%**.
- Developed **Excel dashboard** and **Python** programs for lead generation **EOD reports**. Also Used **SQL** for data retrieval and related data operations.

## TECH STACK

### Expertise in Languages & Tools (x/5)

Python - 4.5 || SQL - 4.4 || Power BI - 4.5 || Advance Excel - 4.5 || GitHub - 4.4

### Platform

Jupyter Notebook, PostgreSQL, MySQL, VS Code, Google Colab, linux

### ML Framework

NumPy, Pandas, Matplotlib, Sci-kit learn, Flask, NLTK, Streamlit, FastAPI

## PROJECTS

### Sales and Revenue Analysis Dashboard

- Analyzed **revenue growth, customer retention, and product performance trends** for improved business strategy.
- Built and publish an **mobile app for on the go analytics**.

### Financial Performance Dashboard

- Monitored **budgets, expenses, and cash flow trends with year-over-year comparisons and dynamic KPIs for CFO teams**.
- Employed the **Dynamic RLS for data security & faster analytics**.

### Customer Segmentation and Behavior Analysis

- Segmented customer data to analyze **purchase patterns and predict churn, enabling targeted marketing campaigns**.
- Utilize the **Azure ML features for building segmentation model**.

## ACHIEVEMENTS

### Gold Badge in Python & SQL

HackerRank || 425 Points in Python and 650 points in SQL

## TRAINING EXPERIENCE

### Data Science Trainee AlmaBetter

06/2022 - 05/2023 Bengaluru, Karnataka  
Skills: Advance Excel, Communication, Reporting, Team Management, Python, statistics, AI/ML

- Learned how we can apply **statistical concept** to make the **data driven decision**.
- Implement **Python and Power BI based Analytical Solutions**.

## EDUCATION

### Bachelor Degree in Mechanical Engineering North Maharashtra University, Jalgaon

07/2012 - 11/2017 P - 67.13%
